

# ROHIT KUMAR YADUVANSHI

Senior Full Stack WordPress & Shopify Developer

Jaipur, Rajasthan, India | +91-8769456797 | [rhtyaduvanshi@gmail.com](mailto:rhtyaduvanshi@gmail.com) | [Portfolio](#) | [linkedin.com/in/rhtyaduvanshi](https://linkedin.com/in/rhtyaduvanshi)

## PROFESSIONAL SUMMARY

Senior Full Stack WordPress & Shopify Developer with 9+ years of experience designing, building, and scaling custom themes, plugins, and eCommerce platforms for enterprise and international clients. Proven track record delivering 300+ production websites with measurable gains in page speed, conversion rate, and content automation, using PHP, WordPress, WooCommerce, Shopify Theme 2.0, Laravel, REST APIs, and ACF Pro. Skilled in Core Web Vitals optimization, headless WordPress architecture, third-party API integrations, and AI-assisted development workflows (Claude, ChatGPT, Cursor, GitHub Copilot, OpenAI API) that accelerate delivery without sacrificing code quality or security. Experienced working with global brands across entertainment, retail, and automotive sectors, with a strong focus on performance, scalability, and long-term maintainability.

**Tools & Analytics:** Postman, Visual Studio Code, Figma, Google Analytics 4 (GA4), Microsoft Excel

## PROFESSIONAL EXPERIENCE

### Full Stack WordPress Developer (May 2025 – Present)

BizzBuzz.AI — United States (Remote)

- Increased site performance by achieving 90+ Google Page Speed scores across client projects, by implementing Core Web Vitals optimization techniques and modern front-end best practices.
- Accelerated feature delivery and reduced debugging time by integrating AI-assisted development workflows, by using Claude, ChatGPT, Cursor, and OpenAI APIs across the WordPress and Shopify build process.
- Improved backend flexibility and reduced code duplication by developing custom WordPress themes and plugins, by leveraging Hooks, Filters, REST APIs, and ACF Pro modules.
- Enhanced front-end performance and scalability for content-heavy sites by building headless WordPress integrations, by connecting a React-based front end to the WordPress REST API.
- Streamlined order, inventory, and customer data flow by implementing Shopify Theme 2.0 storefronts, by developing custom Liquid templates, JSON configurations, and Shopify Admin API integrations with automated webhooks.
- Maintained platform security and uptime for multiple client environments by managing deployments, patches, and cloud-based hosting, across AWS and WP Engine infrastructure.

## WordPress & Shopify Developer (Freelance) (Nov 2024 – Apr 2025)

*Fiverr — Remote*

- Achieved a 100% five-star client satisfaction rate by delivering 30+ WordPress and Shopify projects, by combining responsive design, SEO optimization, and reliable on-time delivery.
- Improved WooCommerce store performance and reliability by diagnosing and resolving high-priority technical issues, by applying targeted performance tuning and custom PHP fixes.
- Expanded site functionality for small business clients by integrating ACF, Elementor, and custom PHP features, by building tailored solutions aligned to each client's workflow.

## Senior PHP Developer (Apr 2024 – Apr 2025)

*NV InfoTech Services — Surat, Gujarat (Remote)*

- Improved operational efficiency for client sales teams by automating lead and document workflows, by integrating Keap/Infusionsoft and DocuSign APIs into custom PHP systems.
- Increased project scalability and long-term maintainability by leading custom PHP and WordPress development initiatives, by applying modular, standards-based architecture.
- Strengthened application performance and reliability by deploying and optimizing hosting environments, on AWS and WP Engine infrastructure.
- Delivered client-specific automation capabilities by building custom plugins and backend modules, by translating business requirements into reusable PHP components.

## Full Stack Developer (Dec 2020 – Feb 2024)

*Jivaso Technologies — Ontario, Canada (Remote)*

- Increased eCommerce conversion rates by up to 35% by enhancing Shopify store design and checkout flow, by optimizing UX, page structure, and product presentation.
- Achieved 90+ Page Speed scores across managed sites by implementing systematic performance enhancements, by auditing and optimizing assets, queries, and third-party scripts.
- Reduced manual transaction and fulfillment errors by integrating payment gateways, CRM APIs, and inventory systems, by building secure, tested API connections across platforms.
- Maintained and scaled a portfolio of CMS and eCommerce sites by managing ongoing WordPress, Shopify, and PHP development, for multiple concurrent international clients.

## Full Stack WordPress Developer (Jul 2018 – Oct 2020)

*IEOTA Technologies — Jaipur, Rajasthan*

- Improved user engagement and organic visibility by delivering UI/UX and SEO-focused website redesigns, by restructuring content, navigation, and on-page SEO elements.
- Expanded platform capabilities and streamlined internal processes by building custom WordPress plugins, by developing reusable, modular PHP components.
- Delivered responsive, cross-device-compatible websites by developing custom PHP features on top of WordPress, for a range of client industries.

## WordPress Developer (Fresher) (Nov 2016 – Jun 2018)

*Webgensis Tech — Jaipur, Rajasthan*

- Reduced site vulnerability exposure and downtime risk by implementing security hardening and performance optimization measures, by following WordPress security best practices.
- Simplified content management for non-technical clients by building custom CMS solutions, by configuring intuitive, maintainable WordPress back-ends.

## KEY PROJECTS

---

### AI Content Automation Platform

- Reduced manual content creation time by 70% by building AI-powered content generation workflows inside WordPress, by integrating OpenAI APIs for automated SEO content, metadata, FAQs, and internal linking.

### Custom WordPress Plugin Suite (Location Pages, Glossary, FAQ Automation)

- Reduced manual content workload by 80% and improved SEO crawl efficiency by engineering a suite of custom WordPress plugins, by implementing Custom Post Types, ACF, REST API endpoints, dynamic templates, and auto-indexing logic. Tech stack: PHP, WordPress, ACF Pro, CPT UI, REST API, MySQL, WP-Cron.

### Duda Custom Widget & Dynamic Content Blocks

- Reduced content update time by 60% and improved multi-location scalability for enterprise clients by building 20+ custom Duda widgets, by developing pricing tables, testimonials, and location modules with JSON collections and dynamic data bindings. Tech stack: Duda Widgets API, JavaScript, JSON Collections, Custom HTML/CSS.
